PLEASE TURN OVER AND COMPLETE THE REVERSE SIDE

Please review the items below and **write either “yes” or “no”** in the space provided. This is a list of MINIMUM requirements that must be provided for a complete review and will greatly help expedite the plan review process. If your plans do not contain the required information, they will be returned to you once they are opened, and could possibly delay your review as they will be examined in the order in which they arrive.

 Do the plans show that the building was designed using the appropriate fire codes? Rhode Island uses NFPA 1 and 101 2012Edition, and all RI amendments also known as RIUFC and RILCS. Is a code footprint provided?

 If you are replacing/installing new or existing carpeting, walls or ceilings, are the finish schedules included? Are they legible?

 If you are constructing rated wall, ceiling, floor assemblies, are the UL listings provided along with a description of construction? Are they legible?

 Are your plans stamped and signed by a registered/licensed Engineer or Architect? (some minor renovations that do not impact egress or fire protection systems may not require one, inquire if one is needed)

 Are all areas marked for their intended use?

 If you are replacing/installing door assemblies, are the schedules provided along with hardware information?

 If you are constructing, or renovating stairs, are complete stair details provided? (width, riser and tread depths, railing details etc.)

 Have you read, and understood all the questions you answered above?

****NOTE: All Fire Alarm plans must be submitted under separate application.**
